Objective

As a full-stack web developer with expertise in Python programming, I specialize in creating dynamic and efficient web applications. My strong foundation in backend development, coupled with proficiency in Data Structures and Algorithms (DSA), allows me to design scalable solutions that optimize performance. From building intuitive front-end interfaces to crafting robust backend systems, I ensure seamless functionality and user experience. With a focus on both server-side efficiency and client-side aesthetics, I am dedicated to delivering high-quality, impactful web solutions.

Skills

Full Stack: Frontend Development, Backend Development, RESTful APIs, Database Management, Microservices Architecture, Version Control (Git), CI/CD Pipelines, Cloud Services (AWS, Azure), Authentication Authorization, Web Security, Responsive Design, JavaScript Frameworks (React, Angular, Vue), Server-side Languages (Node.js, Python, Ruby), Databases (MongoDB, SQL), API Integration, Deployment Monitoring

Deep Learning Machine Learning: Artificial Intelligence (AI), Machine Learning, Supervised Learning, Unsupervised Learning, Reinforcement Learning, Transformer Models, ChatGPT, PyTorch, TensorFlow, Keras, Computer Vision, OpenCV

Data Science & Data Mining: Data Science, Data Mining, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Modeling, Feature Engineering, Data Visualization, Machine Learning, SQL, Python (Pandas, NumPy), R, Big Data Technologies (Hadoop, Spark), Clustering, Classification, Regression Analysis, Anomaly Detection

Development & Programming: Python, Front-End Development, HTML, Java, C, C++, JavaScript, CSS, Bootstrap, Docker, Git, Command Line Interface, SQL, Open Source Development

User Experience & Design: User Experience (UX), User Interface Design, UX Research, Wireframing, Usability Testing, Figma, Product Vision, Innovation Management

Communication & Collaboration: Cross-functional Team Leadership, Team Management, Problem Solving, Software Engineering

Experience

Google Developer Student Clubs

Google DSC Member (Android & Development)
India

July 2023 - Present

- Participating in Google Developer Student Club (DSC) activities with a focus on Android development and general programming.
- Engaging in workshops, coding competitions, and tech events to enhance learning and innovation in Android and development.
- Collaborating with fellow DSC members and industry professionals to gain valuable insights and expand technical skills.
- Completed courses in Generative AI and Google Cloud Labs, further enhancing expertise in cutting-edge technologies.

Techfest Teckzite-2k23

Disciplinary Team Member

[March 2023]

India

- Participated in Techfest Teckzite-2k23 as a member of the Disciplinary Team, responsible for overseeing and managing various events.
- Contributed to the successful execution of tech events by ensuring smooth operations and adherence to event protocols.
- Gained valuable experience in leading and managing events, enhancing organizational and problem-solving skills.
- Collaborated with team members to address challenges and maintain a high standard of event quality.

Internshala Pvt. Ltd

Internshala Student Partner

December 2022 - January 2023

India

- Represented Internshala Pvt. Ltd. at RGUKT-NUZVID.
- Promoted services and opportunities among students through social media, college events, and personal interactions.
- Assisted students in optimizing profiles and applying for internships and training programs.

Education

Rajiv Gandhi University of Knowledge Technologies, Nuzvid

Bachelor of Technology (B.Tech), Computer Science
CGPA: 9.0

October 2022 - April 2026

Rajiv Gandhi University of Knowledge Technologies, Nuzvid

Pre-University Course (PUC), MPC
CGPA: 9.61

January 2021 - October 2022

RSRMCHS StoneHousePet

Secondary School Certificate (SSC), 10th Class
CGPA: 10.0

March 2020

Projects

Zoya - The Talk Bot

Description: Developed Zoya an automatic humanoid robot that interacts with users, providing rapid responses using advanced AI and IoT technologies. The project secured 2nd place at Teckzite, RGUKT Nuzvid 2k24 Project Expo. Featured in Telugu and English newspapers, generating positive feedback and interest.

Role: As a Team Lead, collaborated with a team to conceptualize, design, and develop Zoya. Contributed to AI model training and integration with IoT devices.

Tech Stack: GPT-4, IoT, Prompt Engineering, Speech Recognition

Additional Projects

- **TravelBuddy:** A travel assistant developed during the Clarifai Hackathon, featuring text generation, image recognition, and translation capabilities.
- **Code Refractor:** Utilized GPT-3.5-turbo-16k to refactor code into different programming languages.
- **Romantic Chatbot:** Created a simulated romantic chatbot for entertainment using OpenAI API and GPT-3.

- **SJT Restaurant:** Developed a front-end restaurant website for easy tableside ordering using HTML5, CSS, Bootstrap, and JavaScript.
- **Webpage Auto Refresher:** Automated webpage refreshing with desktop alerts using Python and web scraping libraries.

Professional Achievements & Network

Extensive Professional Network: Connected with nearly 5,000 professionals on LinkedIn, including executives and industry leaders

LeetCode & GeeksforGeeks Practice: Completed 150 questions on LeetCode and over 100 questions on GeeksforGeeks in Data Structures and Algorithms (DSA), demonstrating strong problem-solving and algorithmic skills.

Interests

• Full-Stack Development • Backend Integration • Problem Solving • Startup Ideas • Product Development • Experiencing AI Tools • AI Applications in Various Industries • Finance • AGI (Artificial General Intelligence)

Languages

- **English:** Fluent
- **Telugu:** Native/Bilingual
- **Hindi:** Conversational Proficiency
